PERSONAL PROJECTS

CinemaApp

University Project

06/2023 - 07/2023 Pristine, Kosovo

- Developed in PHP and MySQL.
- This application is developed for booking cinema tickets and watching trailers in the website.

CPU

University Project

12/2023 - 01/2024 Pristine, Kosovo

- Developed in Verilog.
- CPU 16 bits is developed with all the functionality in Verilog and it can be used for sum, subtraction, product and division of numbers with 16 bits.

Tours

Personal Project

01/2014 - 05/2016 Pristine, Kosovo

- Developed in Node.js, MongoDB and PugJS.
- This application serves the purpose of facilitating tour bookings. It incorporates the functionality to make payments using Stripe, adding tours, booking tours and enabling user bookings with login/logout using refresh tokens and it has 5 distinct roles restricted depends on what functionality is set and it is implemented an email service for sending emails.

Restaurant

University Project

10/2022 - 01/2023 Pristine, Kosovo

- It uses MySQL for developing the restaurant database and it uses triggers, data, very advanced subqueries, normalization of database, views etc.

Base64 encoding

University Project

04/2023 - 04/2023 Pristine, Kosovo

- Developed in python.
- Base64 is a form of encoding that uses text transmit data.

LinkedInClone

Personal Project

07/2023 - 08/2023 Pristine, Kosovo

- It is a simple LinkedIn Clone made in IOS and made with external API requests for testing so it doesn't use the real data but the API data and login/signup is developed with all logic and functionality.

LinkedInClone

Personal Project

01/2024 - Present Pristine, Kosovo

- Developed in React.js, nestJS and PostgreSQL.
- The application is designed for job applications, allowing users to apply for jobs posted by companies. It also offers features such as publishing posts, commenting, reacting to posts, creating skills, and updating user profiles. There are three user roles, each with specific restrictions and permissions based on the user's role.

EDUCATION

Computer Engineering

University of Prishtina

10/2021 - Present Pristine, Kosovo

SUMMARY

I am a self-reliant, dependable, and approachable individual who is dedicated to pursuing excellence in my professional journey. My adaptability and strong organizational skills allow me to quickly grasp and master the latest web and software technologies.

SKILLS

JavaScript	Typescript	node.js	React
nestJS	mongoDB	MySQL	python
php	iOS	Java	OOP
C++	C	Verilog	Engineering

KEY ACHIEVEMENTS

MERN STACK DEVELOPMENT CERTIFICATION

In this course held by RIT I was selected as one of the best students and presented an application in front of the Embassy of Italy.

WORK EXPERIENCE

Real Estate Application

Freelancer

01/2024 - 04/2024

I was responsible for implementing several key features, including:

Real Estate Entity Creation: Developed the core entity to manage real estate properties that the client wants to sell. This entity captures essential details such as property type, size (square feet), and other relevant specifications.

Category Management: Added the ability to categorize properties based on different types, such as residential, commercial, or land, depending on the buyer's needs.

Tour Request and Agent Contact: Enabled users to request property tours or contact agents directly. This feature includes showing the agent's personal contact number while maintaining confidentiality.

Advanced Filtering: Implemented a robust filtering system allowing users to search properties based on various criteria, such as price range, property type, location, and size.

While I cannot provide deeper details due to client confidentiality, this overview highlights the primary features and technologies used to deliver a tailored real estate solution.

PHP Developer Internship

Organization Name

07/2024 - Present

I helped on developing projects using wordpress, laravel. It was overall a great experience since I was mentored by senior developers and I adapted easily on the group work of an cooperate.
